synthesis of epidermolysis bullosa acquisita, 594A
T cells and expression of, 568A
UV induction of Ro and La antigens on human keratinocytes, 561A
UVB-induced skin cancer and regulation of tumor-specific and MHC
Antimelanocyte antibodies
vitiligo and, 783
Arachidonic acid metabolism
phagocyte stimulation and, 251A
prostaglandin D2, 448
Arachodonic acid
UVB stimulates release of, 567A
Argon-fluoride excimer laser
putative photoacoustic damage in skin induced by, 761
Arotinoid acid
keratin synthesis with, 252A
Arylamine N-acetylation
activities in skin, 574A
Ascorbate induction of procollagen mRNA, 421
Ascorbic acid
induction of pro α 1 (I) collagen m RNA species by, 598A
regulation of procollagen synthesis by, 611A
Atopic dermatitis
eosinophils in, 589A
Atopic diseases
IgE responses in, 254A
Atopic eczema
IgE molecules in, 238A
Autoantibodies
endemic pemphigus foliaceus in, 585A
psoriasis and, 606A
Ro/SS-A antigens and, 158
urticarial syndromes and anti-IgE, 213
Autologous cultured cells
treatment for vitiligo, 549A
Avian epidermal differentiation
adaptive response to water deprivation and replenishment, 588A

B

Bacteria
inhibition of growth of gram positive and gram negative bacteria in Candida species, 554A
white piedra and, 586A
wound pathogens, 595A
Bacterial and fungal infections
UVB-exposed animals and enhanced susceptibility to, 552A
Basal cell epithelioma
proteinase activities in, 869
Basal cell
carcinoma of,
epithelial tumor cells express fibronectin gene, 596A
immunoinfiltration of, 289
suppression of new tumor formation in, 602A
RNA and DNA content and cell surface characteristics of, 610A
natural killer cell activity in, 591A
gene expression in, 634
Base membrane zone gene expression
by fibroblasts in vitro, 734
chondroitin sulfate proteoglycan in, 283
fibroblasts induce assembly of, 276
heparin sulfate proteoglycan in, 570A
keratinocyte and extracellular matrix protein relationships, 623
microthread-like filamentous network and, 620A
neutrophil interactions with, 561A
type VII collagen in epidermal, 639
Basic fibroblast growth factor
acceleration of epidermal wound healing by human, 568A
keratinocyte growth and, 767
melanocytes and, 566A
melanoma and, 566A
production of mRNA for, 579A
Behcet's disease
interleukin 1 in, 564A
Beta lipopropin activity
Thy-1$^+$ dendritic epidermal cells and, 548A
Biological response modifiers
melanoma and, 254A
Birbeck granule-like structures
Langerhans cells with, 298
Black hairy tongue epithelium
keratin expression in, 584A
Bloom's syndrome
in vivo DNA ligase activity in, 604A
BMY 30047
topically active retinoid with low local and systemic toxicity, 592A
Bone marrow suppression
UVB enhances recovery from, 547A
Bovine papillomavirus E2 protein,
identification of two functional domains and three forms of, 568A
Bovine-derived activated platelet releasate
healing of chronic wounds with, 608A
Bromodeoxyuridine
immunocytological detection of, 255A
BSF-2
keratinocytes production of, 619A
Bullous dermatosis
IgA subclass deposits in dermatitis herpetiformis and, 614A
Bullous pemphigoid
230 kD basic protein is major antigen in, 591A
antigens in, 603A, 620A
composition of, 577A
eosinophil-mediated basement membrane zone injury in, 614A
lymphoblastoid cell lines in, 602A
studies in antibodies of, 495
Burns
Langerhans cells in, 142

C

C-fos gene
melanocytes and, 596A
C-terminus of protein
induction of epidermal growth factor dependent transformation and, 583A
C3d
production of, 546A
CA^{++}-dependent proteinases, 26
Calciotropic hormones
human melanoma cell lines and, 834
Calcium
1,25-dihydroxycholecalciferol and, 586A
blister formation in low calcium medium, 501
calcium-induced terminal differentiation of keratinocytes, 556A
detection of antibodies of pemphigus vulgaris with, 585A
growth and proliferation of keratinocytes with Mg^{-2} and, 612A
pemphigus vulgaris antigens in keratinocytes and, 708
Calcium/calmodulin dependent protein kinase activity
human neoplastic skin disorders and, 582A
Calmodulin
inhibition of human keratinocyte proliferation by, 239A
Calpains
purification and characterization of, 26
Candida acid proteinase
expression in *Candida albicans,* 600A
Candida albicans
proteinase expression in, 600A
Candida species
inhibition of growth of gram positive and gram negative bacteria by, 554A
Captopril
induction of tissue-specific autoantibodies by, 547A
Carboxyl-terminal domain of type VII collagen
recessive dystrophic epidermolysis bullosa and, 604A
Carboxylpeptidase
purification of human skin mast cell, 564A

Carboxylpropeptide
type I procollagen and, 569A
Carcinoma
basal cell, 869
cell surface glycoproteins in, 245A
epithelial tumor cells express fibronectin gene, 596A
new tumor formation suppression in, 602A
RNA and DNA content and cell surface characteristics of, 610A
glycosaminoglycans production in sclerosing, 590A
natural killer cell activity in, 591A
gene expression in, 634
immunoinfiltration in, 289
cervical
efficient detection of papillomavirus in, 577A
disruption of cell periphery protein in, 583A
management with photoradiation therapy with porphyrins and light, 652
skin,
PUVA-48 in, 560A
regulation of tumor-specific and MHC antigens in UVB-induced, 263
squamous cell, 558A, 869
fibroblasts and keratinocytes in, 548A, 615A
Cartilage proteoglycan
localization of epidermal hyaluronic acid with, 412
Cationic conductance
keratinocytes and, 601A
Cationic photosensitizers
melanoma cells and, 594A
CD1 antigen expression
interleukin 1 induces, 13
CD3$^+$ cells
T-cell differentiation antigens and, 560A
CD1a protein
hybridization of, 588A
molecular cloning of, 582A
cDNA clone
isolation and characterization of, 587A
Cell cycle kinetics
flow cytometric DNA analysis and, 857
Cell differentiation
hair follicles and, 65
inositol triphosphate in, 37
Cell envelopes
transglutaminase inhibitors decrease, 564A
Cell metabolism
effects of PUVA on, 586A
Cell proliferation
seborrheic dermatitis and, 578A
Cell surface glycoproteins
basal cell carcinoma and, 245A
Cellular immunity
UVB suppression of, 366
Cervical dysplasia
disruption of cell periphery protein in, 583A
Cervix
carcinoma of,
disruption of cell periphery protein in, 583A
efficient detection of papillomavirus in, 577A
Channel formation
paroxysmal nocturnal hemoglobinuria erythrocytes and, 617A
Chemoattractant peptides
human monocyte preparations and, 558A
identification and characterization of, in epidermal cells, 122
Chemotaxins
eosinophils and neutrophils in, 249A
monocyte derived neutrophil activating peptide, 251A
PMN and, 249A
Chemotherapy
dipyridamole potentiates the antiproliferative actions of methotrexate and 5-fluorouracil, 607A
incorporation of 4-S-cysteinylphenol into malignant melanoma cells, 725
Chest hair density in men
correlation of serum 3α androstanediol glucuronide with, 582A
CHILD syndrome
phenotypic dichotomy in eicosanoid metabolism by skin fibroblasts, 564A
Cholesterol sulfate
X-linked ichthyosis and, 238A
Chondroitin sulfate proteoglycan
component of dermoepidermal junction, 283
Ciclopiroxolamin
inhibition of P-450 isoenzymes by, 238A
Cis-urocanic acid
defective antigen presentation and, 92
Cloudman melanoma cells
interleukin-1 exhibits regulation of MSH receptor system, in, 596A
regulation of melanogenesis in, 543A
Coccidiodes immitis
identification of serodiagnosotic antigens from, 601A
Cold agglutinin disease
malignant basal cell carcinoma and, 253A
Collagen and gene expression
PUVA therapy and, 543A
Collagen defect
necrobiosis lipoidica, 227
Collagen fibrils
scleroderma skin and, 48
Collagen gel lattice contraction
cross-linking sites and, 618A
Collagen gene expression
connective tissue in dermis and, 243A
Collagen metabolism
UVB and, 576A
Collagen mRNA
wounded skin and, 606A
Collagen production
disregulation in scleroderma, 558A
epidermolysis bullosa and, 170
scleroderma and increased, 664
Collagen
hair growth and synthesis of, 245A
hybridization of, 559A
UVB-induced changes in, 607A
Collagenase
regulation in skin, 557A
Colony stimulating factors
thymic epithelial cells produce, 580A
Comedones
lipids and, 350
Computer reconstruction
follicular pathology and, 237A
human embryonic dermal vasculature in, 572
Concanaval in A
strain differences in proliferative responses of Thy-1$^+$ dendritic epidermal cells to, 611A
Concanavalin A-reactive cells
Thy-1$^+$ dendritic epidermal cells and cloning of, 671
Condylomata acuminata
interleukin-1 production and interferon alpha therapy in, 614A
treatment of, 545A
Condylomata
efficient detection of human papillomavirus in cervical carcinoma and, 577A
Congenital melanocyte nevi
malignant potential of, 253A
Connective tissue diseases
anti-nuclear matrix and, 553A
Connective tissue nevi
differential expression of matrix proteins in, 607A
Connective tissue production
collagen gene expression and, 243A
Contact hypersensitivity
antigen-specific T-cell hybridomas and, 547A
functional T-cell deficiencies and allergic, 546A
neutrophils regulate intensity of, 553A
ratio of Langerhans cells to Thy-1$^+$ dendritic cells in, 770
UV-irradiated Ia$^+$ and Thy-1$^+$ epidermal cells and, 552
Contact inhibitory factor
malignant melanoma and, 569A
Contact sensitivity
hypersensitivity, 563A
optimization of lymphocyte blastogenesis response to, 602A
Cornified envelope
basic protein precursors of mammalian, 598A
isolation and characterization of a cDNA clone encoding a major component of, 587A
Cortical cell differentiation
invading fungi in black dot ringworm and, 729

Corticosteroid bioavailability
variation in, 609A
Coumarine
melanoma and, 254A
Cutaneous cell-bound IgE
atopic dermatitis and, 117
Cutaneous disease
plasminogen activator in, 777
Cutaneous reactive hyperemia
superoxide radicals and, 586A
Cutaneous response
to mixed surfactant system, 601A
Cutaneous side effects of drugs, 774
Cyclic AMP
inflammation and, 240A
regulation of melangenesis in Cloudman melanoma cells, 543A
Cyclical mechanical pressure
keratinocytes and, 241A
Cyclooxygenase/lipoxygenase inhibition
tepoxalin, 550
Cyclosporin
hair growth and, 563A
psoriasis and, 251A, 605A
Cyclosporin A
epidermal growth inhibition and, 536
keratinocyte proliferation and, 796
persistent light reaction and, 239A
psoriatic arthritis and, 586A
Cyclosporine
alopecia and, 565A
mechanism of absorption in the skin sandwich flap model, 597A
skin granuloma formation immunosuppressed by, 430
Cyclosporine A
activation of T cells in atopic dermatitis with, 612A
inflammatory hyperplastic response inhibition with, 559A
Cystic fibrosis
epidermal growth factor in human sweat in, 584A
Cysts
lipids in, 225
Cytokines
expression in melanoma, 577A
immune responses and, 576A
keratinocyte expression by, 544A
melanoma and epidermal, 250A
molecular characterization of epidermal, 605A
regulation of MHC antigen expression by different epidermal, 607A
spleen cells and, 543A

D

Decay-accelerating factor
elastic fibers and epidermal cells associated with, 616A
Defense systems
and oxidative stress in skin, 560A
Dendritic cell marker
molecular cloning of CD1a protein, 582A
Dermal endothelial cells
interleukin-1 and, 549A
Dermal macrophages
newborn human foreskin, 609A
Dermatitis herpetiformis
HLA types of American Black patients with, 552A
IgA subclass deposits in bullous dermatosis and, 614A
mucosal immune response to dietary antigens and, 658A
Dermatitis
atopic,
activation of T-cells with cyclosporine A in, 612A
cutaneous cell-bound IgE in, 119
monoclonal antibody detection of leukocyte phosphodiesterase in, 55
protein kinase in, 526
contact,
platelet activating factor in, 238A
test reactions in, 242A
seborrheic,
cell proliferation in, 578A
Dermatofibrosarcoma protuberans
histiocytic origin of, 247A
Dermatoheliosis
UVB exposure and, 325
Dermatologic inflammatory disorders
tepoxalin and, 588A
Dermatology, golden anniversary of The Journal of Investigative, 89
Dermatophytosis
model of, 543A
Desmosomes
alignment in stratifying human epidermis, 550A
human epidermis and, 552A
Desquamation
lamellar body-derived hydrolytic enzymes in, 588A
molecular basis for, 600A
Dexamethasone
keratinocytes and skin fibroblasts with, 547A
Differentiation markers
in psoriatic epidermis, 801
Diffusion channel in stratum corneum
penetration of Lucifer Yellow into human skin, 584A
Dihydroxyvitamin D^3
epidermal differentiation and, 600A
Dipyridamole
potentiation of antiproliferative actions of chemotherapy, 607A
DNA endonuclease activities
nucleosome structure differentially influences activity of, 595A
DNA ligase activity
Bloom's syndrome and in vivo, 604A
DNA repair
in rat cells, 346
DNA synthesis
human keratinocytes catabolize thymidine, 8
psoriasis and, 382
substance P and substance K in, 399
DNA-cytophotometry
T-cell lymphoma and, 425
Doxorubicin
myocardiotoxocity induced by, 618
Doxycycline
photosensitization by, 607A
Drug diffusion studies
in stratum corneum/epidermal tissues, 317
laser-enhanced percutaneous transport, 571A
mouse skin as model form, 810
oleic acid concentration, 584A
variation in corticosteroid bioavailability from different topical dosage forms, 609A
Dual genotype
cutaneous T cell lymphoma and, 73
Dysplastic nevus syndrome
increase susceptibility to melanoma with hereditary, 577A
UVB radiation and, 619A
Dystrophic epidermolysis bullosa
antigens in, 558A

E

8-MOP
photoinduction of prolonged cutaneous photosensitivity by topical, 818
plasma levels with, 234
repair of UV light-induced 8-MOP-DNA adducts, 617A
tumors and, 175
EB virus
monoclonal antibodies and transmission of, 567A
Eczema
atopic,
skin sensitivity in, 241A
EGF binding
hydrocortisone increases, 610A
Eicosanoid metabolism
CHILD syndrome and, 564A
Elastic fibers
decay-accelerating factor in skin, 616A
UV-induced damage of, 697

Elastin
cloning of full-length elastin cDNAs, 557A
elastin mRNA and production of, 643
Electron microscopy
diagnostic, 773
Electron probe analysis of human skin
element concentration profiles in, 78
Element concentration profiles
electron probe analysis of human skin, 78
Embyronic dermal vasculature
computer reconstructions of human, 572A
Endemic pemphigus foliaceus
acantholysis and, 561A
IgG subclass response in, 602A
Endothelial cells
exocytotic pathways in, 251A
histamine-induced gap formation in microvascular, 589A
laminin in differentiation of, 578A
lupus anticoagulant and function of, 744
retinoids and stimulation of proliferation of, 610A
Endothelial stimulation
von Willebrand factor in AIDS and, 703
Eosinophil degranulation
herpes gestationis and, 606A
Eosinophil granule major basic protein
endocytosis of, in mast cells, 581A
Eosinophils
atopic dermatitis and, 589A
bullous pemphigoid and, 614A
chemotaxins and, 249A
Epidermal acyceramides
fatty acids in, 350
Epidermal cells
chemoattractants for, 122
chemotactic activity of, 243A
T-cell development and, 244A
UVB and proliferation of, 549A
Epidermal differentiation
25KD protein marker of, 593A
dihydroxyvitamin D_3 and, 600A
spingolipid biosynthesis and, 590A
Epidermal growth factor binding
UV and, 585A
Epidermal growth factor receptors
fetal skin and, 576A
hyperproliferative skin disease and, 592A
modulation by retinoic acid, 620A
role of C-terminus and induction of EGF dependent transformation, 583A
Epidermal growth factor
human sweat and cystic fibrosis, 584A
increased epithelialization of partial thickness wounds with recombinant human, 588A
retinoic acid and, 613A
Epidermal hypoplasia
glucocorticoid in, 603A
Epidermal keratins
polymorphism and, 548A
Epidermal proliferation
deficient binding of anti-GM3 monoclonal antibody to stratum corneum in disorders of, 595A
Epidermal proteinases
proteolysis and, 829
Epidermal repair
in elderly subjects, 845
Epidermal thymocyte activating factor
melanogenic response of pigment cells and, 611A
Epidermal transglutaminase
localization and in vivo activity of, 472
Epidermis
calpains in, 26
dendritic cells in, 241A
lipids in, 225
lymphocyte interactions in, 230
phospholipase A_2 in human, 23
T-cell development and, 240A
Epidermodysplasia verruciformis
human papillomavirus in, 593A
Epidermolysis bullosa acquisita
antigens in, 127, 594A
macrophage and polymorphonuclear leukocyte factor and collagenase in, 170
Epithelial growth and differentiation
studies in, 583A
differentiation and, 100
Erythropoietic protoporphyria
porphyria cutanea tarda and, 599A
Etretin
comparison of topical retinoid activity of etretinate and, 613A
Etretinate
comparison of topical retinoid activity of etretin and, 613A
metabolites of, 614A
Exocytotic pathways in human cutaneous endothelial cells, 251A
Experimental skin models, 580A
Extracellular matrix production
growth regulating factor and, 615A
Extracellular matrix proteins
keratinocyte migration and, 623
Extracellular matrix
eruptive xanthoma and, 551A
fibronectin, 434
keratinocytes in, 100

F

5-S-cysteinyldopa
melanoma and, 149
4-S-cysteinylphenol
malignant melanoma cells and, 725
Factor XIII
fibrovascular tumors and, 592A
Fatty acid metabolism
keratinocytes and, 607A
Fetal development
hair- and nail-forming cells, 248A
Fetal skin
epidermal growth factor receptors and, 576A
hexabrachion in, 582A
morphogenesis and differentiation of, 566A
nerve growth factor receptor and, 570A
patterns of type VI collagen in, 609A
Fetal thymocytes
T cell receptor and Thy-1^+ dendritic epidermal cells in, 581A
Fibrils
hybridization of collagens within single, 559A
Fibroblast collagenase gene
studies in, 609A
Fibroblasts
basement membrane assembly with, 276
collagen production in scleroderma by, 664
cytokines in keratinocytes and growth of, 250A
gene expression in, 594A
human dermal fibroblasts synthesize laminin, 679
identification of subpopulations of dermal, 620A
increased filopodia and growth inhibition of, 610A
protein kinase C activity in psoriatic, 406
pyrimidine dimers and, 346
retinoids and, 249A
tumor necrosis factor modulates functions of, 250A
type I and III collagens produced by, 420
Fibronectin extracellular matrix
assembly of, 434
Filaggrin
function of, 559A
studies of filaggrin gene, 587A
synthesis of, 595A
Filament cytoskeletal network
function of, 556A
Filament structure
studies in, 583A
Filopodia
fibroblast growth inhibition and increase, 610A
Fish-oil supplementation
retinoid-related hyperlipidemia in psoriasis and, 544A

Flow cytometric DNA analysis
cell cycle kinetics and, 857
Flow cytometry
characterization and separation of pigmented and albino melanocytes using, 548A
Follicular pathology
computer reconstruction in, 237A
Fungus
black dot ringworm and invasion of, 729

G

G_o recruitment
in epidermis, 44
Gamma glutamyl peptidase
formation of, 490
Gamma-interferon
differential expression of Ia by murine keratinocytes with, 572A
genital warts and, 242A
histiocytosis X and, 249A
Langerhans cells and, 246A
peripheral blood mononuclear leukocyte/keratinocyte binding and, 17
phorbol ester treatment and keratinocytes treated with, 684
psoriasis and, 565A
sarcoidosis and, 242A
Gap formation
psoriasis and histamine-induced, 589A
Gene expression
PUVA therapy and collagen and, 543A
sclerosing basal cell carcinoma and, 634
Genital warts
gamma-interferon and, 242A
Glucocorticoid triamcinolone acetonide
UVB-induced immune suppression with, 366
Glucocorticoid
epidermal hypoplasia and, 603A
Glucocorticosteroids
direct effects on Langerhans cells, 560A
Glycolipids
UVB and neutral, 609A
Glycosaminoglycan production
sclerosing basal cell carcinoma and, 590A
Glycosaminoglycan synthesis, 215
fluid from chronic wounds and, 557A
somatomedin-C increases, 603A
Glycosaminoglycans
human epidermal keratinocyte differentiation and, 598A
interferon and suppression of keloidal fibroblast, 546A
Granulocyte activation
tumor necrosis factor and, 255A
Granulocyte-macrophage colony-stimulating factor
Langerhans cells and, 244A, 569A
Granulomas
local and systemic effects of granulomatous reaction elicited in skin, 567A
Group B and G streptococcus
gluteal fold psoriasis and, 593A
Group E
xeroderma pigmentosum and assignment to, 152
Growth factor
keratinocytes and, 767
transforming growth factor beta in keratinocyte maturation, 336
Growth hormone
psoriasis and elevated, 550A
Growth promoting agents
melanocytes and, 569A
Growth regulating factor
modulation of keratinocyte bahavior and extracellular matrix production by, 615A
Growth-promoting agents
thymidine incorporation and, 2

H

Hair follicle growth
localization of radiolabeled minoxidil and, 574A
Hair follicles
androgen receptor protein in sebaceous glands and, 606A
angiogenic properties of, 409
cell differentiation in, 65
inhibition of androgen binding to receptor protein in sebaceous glands and, 605A
translocation of androgen-receptor protein complex into nuclei of sebaceous glands and, 605A
Hair growth
cyclosporin and, 563A
dermal hair bulb papilla in, 245A
hair- and nail-forming cells in fetal development, 248A
Hair loss
mouse model of localized, 557A
Hair protein pattern
male androgenetic alopecia and absence of, 597A
Hair
integral lipids in, 617A
solubilization of human hair for protein characterization, 570A
Heliodermatitis
chronic, 325
Hemidesmosome-anchoring filament complex-associated antigen, 558A
Henoch-Schonlein purpura
cutaneous sign of, 598A
Heparin sulfate proteoglycan
core protein of, 570A
monoclonal antibody, 590A
Hepatic granulomas
induction of T cell maturation with, 560A
Hermansky-Pudlak syndrome
thioredoxin reductase activity in, 372
Herpes gestationis
antigens in, 590A, 603A
eosinophil degranulation in skin lesions of, 606A
Herpes simplex virus
human keratinocytes and, 549A
study model for, 629
Herpes simplex virus associated erythema multiform
antigens in, 245A
Heterozygotes
identification of putatuve, 372
Hexabrachion in human fetal and adult skin, 582A
Histadine-rich protein
proteolysis of, 829
Histamine release
mastocytosis spleen cells and prostaglandin D2, 359
suppressed in mast cell function by UVB, 806
Histamines
hyperemia and prostaglandins with, 618A
late phase of hematoporphyrin derivative-induced photoxicity and release of, 568A
pathogenesis of scleroderma, 557A
role for hydrogen peroxide in phototoxic histamine release from mast cells induced by protoporphyrin and UVA light, 563A
ultraviolet light-induced inhibition of release of, 239A
Histiocytosis X
monoclonal antibody against gamma-interferon and, 249A
phenotypic spectrum of, 441
HLA types
American Black patients with dermatitis herpetiformis and, 552A
HLA-DR
alopecia areata and ectopic, 193
Langerhans cells and, 237A
Homeostasis
model for epidermal, 739
Homeostatic mechanisms in elderly, 613A
Hormones
hormonal changes in melasma patients, 551A
human melanoma cells and calciotropic, 834
Human epidermal proteolipids
function of, 185
Human papillomavirus
cervical carcinoma and efficient detection of, 577A
detection of, 246A
digital squamous cell carcinoma and, 556A
epidermodysplasia verruciformis and, 593A
interferon alpha and, 242A
non-genital Bowen's disease and, 575A

urine and, 241A
Hutchinson-Gilford progeria
elastin production in, 643
Hyaluronate
localization of epidermal, 412
Hyaluronic acid synthesis
retinoic acid preserves, 579A
Hybridization techniques
detection of HPV-DNA with, 246A
in situ, 253A
Hybridomas
antigen-specific T-cell hybridomas and contact hypersensitivity, 547A
Hydration damage
permeation studies in mouse skin and, 486
Hydrocortisone
EGF binding with, 610A
Hydrogen peroxide
pseudomonas skin infections and, 585A
Hymenoptera venom allergy
lymphocyte transformation and specific antibody secretion in, 247A
Hyperemia
adenosine and cutaneous reactive, 620A
aging and, 618A
histamine and prostaglandins in cutaneous reactive, 618A
Hyperlipidemia
fish-oil and psoriasis, 544A
Hyperplasia
2,3,7,8-tetrachlorodibenzo-p-dioxin and epidermal, 605A
Hyperproliferative skin disease
epidermal growth factor receptors and, 592
Hypersensitivity
alpha-melanocyte stimulating hormone and contact, 601A
antigen specific T cell in delayed, 572A
antigen-presenting cells that regulate contact, 591A
atopic dermatitis and, 117
contact sensitivity and, 563A
development of contact, 576A
initiation of delayed-type, 244A
mast cell participation during allergic contact, 575A
mast cells in allergic contact hypersensitivity of the lung, 595A
Thy-1$^+$ cells and, 567A
vitamin A acetate and contact, 595A
Hyperthermia
immunological effects of in vitro, 619A
Hypohidrotic ectodermal dysplasia-hair protein patterns
sweat gland function and, 579A
Hypothalamus-pituitary-adrenal axis suppression
analysis of, 532

I

Ichthyoses
intercellular lipid organization in, 617A
IgA disease antigens
linear, 614A
IgA pemphigus foliaceus, 547A
IgA subclass deposits
in dermatitis herpetiformis and, bullous dermatosis, 614A
IgA-associated vasculitis
cutaneous sign of, 598A
IgE antibodies
allergenic components of wheat flour and, 249A
IgE molecules
atopic eczema and, 238A
IgE response
atopic diseases and, 254A
IgG subclass response
Endemic Pemphigus Foliaceus and, 602A
Immune responses
effect of UV-induced epidermal cytokines on, 576A
photochemotherapy for inhibition of, 546A
Immune system
functional interactions between skin and, 749
Immunofluorescence studies
difference of amyloid and colloid bodies in, 520
localization of peripheral proteins with, 331
Immunoglobulin gene rearrangement
T-cell malignancy and, 73
Immunogold labeling
Langerhans cells and, 298
Immunoreactive IL 1
human sweat secretion and, 554A
Inflammatory skin diseases
mast cell growth in, 601A
Inositol phospholidid metabolism
in murine keratinocytes, 37
Inositol triphosphate
cellular differentiation and, 37
Insulin
thymidine incorporation in keratinocytes by, 2
Intercellular lipid organization
ichthyoses and, 617A
Interferon
condylomata acuminata and increased interleukin 1 production normalized after successful interferon alpha therapy, 614A
induction of different keratinocyte expression with gamma, 592A
melanogenesis and, 572A
protein secretion affected by gamma, 590A
psoriasis and gamma-, 511, 554A, 592A
treatment of condylomata acuminata with liquid nitrogen and alpha-, 545A
Interleukin-1
Behcet's disease and, 564A
CD1 antigen expression and induction of, 13
cutaneous T-cell lymphoma and, 378
dermal microvascular endothelial cells and, 549A
neuropeptides and, 602A
prostacyclin release from endothelial cells by, 604A
psoriasis and, 552A
regulation of expression of, 248A
regulation of keratinocyte prostaglandin synthesis by, 597A
regulation of MSH receptor system in Cloudman melanoma cells with, 596A
subcellular distribution of different molecular weight forms of, 587A
UVB exposure and IL-1 like activity, 591A
UV-induced systemic immunosuppression and, 252A
Interleukin-3
UVB exposure and IL-3 like activity, 610A
Interleukin-6
T-cell activation with, 578A
Isotretinoin
neutrophil chemotaxis in cystic acne and, 885
treatment of acne with, 580A

K

Kallikrein
glandular kallikrein and angiotensin converting enzyme in human eccrine sweat, 569A
in psoriatic epidermis, 505
Kaposi's sarcoma
histologic predictors of survival in AIDs-associated, 593A
Kathon^R
in vitro percutaneous penetration of, 554A
Keloidal fibroblast suppression
interferon and, 546A
Keratin genes
chromosomal mapping of human, 581A
Keratin heterogenity
function in human epidermis, 555A
Keratin K19
keratinocyte function and, 555A
Keratin synthesis
regulatory mechanisms of, 546A
Keratin
hair-related, 553A
Keratinocytes
basic fibroblast growth factor and growth stimulation of, 767
binding of mononuclear leukocytes and, 17
biosynthesis of retinoic acid from retinol in differentiating, 608A
calcium-induced terminal differentiation of, 556A

calmodulin and inhibition of proliferation of, 239A
cationic conductance in, 601A
cultured in strontium-containing serum-free medium, 690
cyclical mechanical pressure in, 241A
cyclosporin A inhibits proliferation of, 796
cytokines and expression of, 544A
dexamethasone responses and, 547A
expression of pemphigus vulgaris antigen in, 577A
extracellular matrix and, 100, 623
fatty acid metabolism in, 607A
fibroblast growth and, 250A
gamma-interferon induces different expression of, 592A
growth and differentiation of psoriasis, 239A
growth and proliferation with low ca^{+2} and mg^{+2}, 612A
growth of, 618A
herpes simplex virus specific cytotoxicity directed against human, 549A
immunofluorescence in, 331
induction of antigen-specific T-cell unresponsiveness by Ia^{+}, 562
inhibition of class I and II antigen expression by, 238A
inositol phospholipid metabolism in murine, 37
interleukin-1 and regulation of synthesis of, 597A
keratin K19 and function of, 555A
Langerhans cells and growth of, 611A
leukotriene B_4 and proliferation of, 601A
levels of cellular retionic acid-binding protein in differentiation of, 608A
lipid composition of, 583A
lipid lamellae in, 110
lymphoproliferative responses in, 415
marker of differentiation in human epidermal, 598A
melanocyte growth in, 564A
model for herpes simplex virus specific cytotoxicity, 629
morphologic similarities between thymic cells and, 749
nerve growth factor and, 619A
phorbol ester treatment and gamma-interferon-treated, 684
pluripotent, 605A
production of BSF-2, 619A
protein kinase C regulates terminal differentiation in, 559A
protein kinase in, 555A
regulation of IL-1 expression in, 248A
retinoids in DNA synthesis and, 861
SSA/Ro antigen expression in simian virus 40-transformed, 342
stem-like and amplifying cells in the NM 1 line of human, 564A
substance P and substance K and proliferation of, 399
thymidine and catabolization of, 8
thymidine incorporation in, 2
transforming growth factor and growth regulation in, 599A
transforming growth factor beta in, 336
type IV collagen enhances collagenase synthesis by, 597A
wound healing and maturation markers, 770
Keratins
expression in black hairy tongue epithelium, 584A
studies in, 603A
tightly linked human keratin genes are not closely related, 571A
Keratohyalin granules
monoclonal antibodies and, 611A
Khellin
levels of, and determination of phototoxicity in, 566A
treatment of vitiligo with UVB and, 720
Killer cell activity
T-cell lymphoma and, 618A

L

Lamellar bodies
desquamation and, 588A
Lamellar sheets
preparation of, 543A
Laminin
cloning of cDNAs coding for, 594A
differentiation of human endothelial cells with, 578A
expression of basement membrane zone genes and, 734
human dermal fibroblasts synthesize, 679
Langerhans cells
2,3,7,8-tetrachlorodibenzo-*p*-dioxin increases, 600A
antigens in, 13
burns and, 142
contact hypersensitivity and ratio of $Thy\text{-}1^{+}$ dendritic cells to, 770
direct effects of glucocorticosteroids on, 560A
granulocyte-macrophage colony stimulating factor and, 244A
GM-CSF and, 569A
histiocytosis cells and, 441
HLA-DR and, 237A
immunostimulatory capabilities of in vitro, 201
increase in MHC antigens on, 387
keratinocyte growth and, 611
release of gamma-interferon by epidermal, 246A
skin allograft acceptance and, 610A
systemic lupus erythematosus and, 573A
T-cell activation and, 320, 612A
T-cell activation by anti-CD3 antibodies in, 602A
T helper cells lines and, 568A
transmission of human immunodeficiency virus by, 546A
tumor promotors impair function of, 293
Lasers
laser-enhanced percutaneous transport for topical drug delivery and pharmacologic monitoring, 571A
putative photoacoustic damage in skin induced by pulsed ArF excimer, 761
skin sensitivity in atopic eczema and laser Doppler flowmeter, 241
spotsize effects after pulsed irradiation, 877
tissue responses to laser microablation of skin, 615A
ultrastructural response of lentigines to Q-switched ruby, 581A
Lentigines
q-switched ruby laser and, 581A
Leprosy, 589A
Leukotriene B_4
enzyme catalyzed oxidation product of arachidonic acid, 591A
keratinocytes and, 601A
PMN and, 254A
Leukotrienes
metabolism of exogenous, 590A
Lichen planus
pathogensis of, 563A
Lipid composition
and metabolism in keratinocytes, 583A
Lipid lamellae
keratinocytes and, 110
Lipid liposomes
stratum corneum, 259
Lipid peroxidation
Photofrin-I and Photofrin-II in, 652
Lipid proteinosis
elevated collagen levels in, 734
Lipids
comedones and, 350
hair and integral, 617A
nonpolar lipids of pig epidermis, 225
Lipocortin-I
immunolocalization of, 557A
Liposomes
preparation of, 543A
Lonapalene
psoriasis and, 550A
Long-chain alkanes
generation of, 567A
Lucifer Yellow
penetration into human skin, 584A
Lupus anticoagulant
systemic lupus erythematosus and, 744
Lupus erythematosus
relationship between Ro positive Sjogren's syndrome/lupus erythmatosus and neonatal, 587A
subclass antibodies in, 555
Lymphoblastoid cell lines
bullous pemphigoid and, 602A
oxidative stress on, 544A
Lymphoblasts
adhesion to epidermal keratinocytes, 608A
Lymphocyte blastogenesis response
contact hypersensitivity and optimization of, 602A
Lymphocytes
adhesion to specialized endothelium in wounded skin, 567A
basal cell carcinoma and suppression of new tumor formation with T-, 602A

clonal proliferation of T lymphocytes in T-cell neoplasm, 612A
epidermis and interactions with, 230
hymenoptera venom allergy and, 247A
immunophenotypic analysis of suppressor-inducer, 604A
persistance of 8-MOP-DNA photoadducts in, 562
specific suppression of anti-allograft immunity by immunization with photoinactivated effector, 597A
transforming growth factor-beta is a keratinocyte-derived lymphocyte inhibitory factor, 592A
uroporphyrinogen-1-synthase and, 247A
Lymphoepidermal interactions
class II MHC antigen expression by keratinocytes and, 886
Lymphoma
cold agglutinin disease and malignant basal cell, 253A
depressed lymphokine-activated killer cell activity in T-cell, 618
DNA-cytophotometry in cutaneous T-cell, 425
dual genotype in cutaneous T-cell, 73
epidermal interleukin-1 in cutaneous T-cell, 378
immunophenotype in cutaneous malignant, 243A
killer cell activity in T-cell, 571A
T-cell markers in, 549A
T helper/suppressor ratios in bone marrow of patients with cutaneous T-cell, 587A
Lymphotoxin
adult T-cell leukemia and, 614A
Lysyl hydroxylase activity
minoxidil and, 591A

M

Macroconidia
Trichophyton mentagrophytes and, 165
Mast cells
allergic contact hypersensitivity in the lung and, 595A
chronic heliodermatitis and, 325
cutaneous mast cell infiltrates in mastocytosis syndromes, 589A
endocytosis of eosinphil granule major basic protein by, 581A
functional comparison of purified mouse cutaneous and peritoneal, 582A
growth of, 601A
mast cell degranulation inhibition test, 573A
mast cell participation in allergic contact hypersensitivity in the lung, 575A
mechanism of photoactivation of, 545A
portwine stain treatment and, 395
purification of human skin mast cell carboxypeptidase, 564A
role for hydrogen peroxide in phototoxic histamine release from mast cells induced by protoporphyrin and UVA light, 563A
tumoricidal activity of mast cell granules, 574A
ulcers and, 548A
UVB effects on function of, 806
Mastocytosis spleen cells
inflammatory mediators in, 359
Mastocytosis syndromes
cutaneous mast cell infiltrates in, 589A
Matrix proteins
differential expression of, 607A
Maturation markers
in cultured epidermal allografts, 598A
Melanocyte cytotoxicity, 783
vitiligo and, 783
Melanocytes
basic fibroblast growth factor and, 566A
differentiation of, 596A
increased growth, 564A
metabolism of exogenous leukotrienes by keratinocytes and, 590A
pigmented and albino, 548A
regulatory factors that determine growth and phenotype of, 569A
sequence analysis of melanocyte specific gene, 579A
SV40/Ad12 transformation of human, 571A
vitamin D and stimulation of, 882
Melanogenesis
interferon and, 572A
regulation of, 543A
Melanoma
antigen expression in metastatic, 755
antigens in, 562
beta-adrenoceptors in, 253A
bFgF acts as an oncogene in human, 566A
biological response modifiers and, 254A
calciotropic hormones and melanoma cell lines, 834
contact inhibitory factor and malignant, 569A
correlation of alpha-actinin, tropomyosin, and fibronectin distribution in, 550A
coumarine and, 254A
cytokine expression in, 577A
diagnostic features of malignant, 252A
epidermal cytokines and, 250A
5-S-cysteinyldopa and, 149
hereditary dysplastic nevus syndrome and increased susceptibility to, 577A
human melanosome associated antigens (HMSA) and, 179
immunoglobulin G antibodies in, 207
incorporation of 4-S-cysteinylphenol into human melanoma cells, 725
keratinocytes synthesize and express nerve growth factor, 613A
membrane associated thioredoxin reductase in, 606A
monoclonal antibodies and, 452, 459
phosphorylated L-dopa and, 596A
proteoglycans in, 570A
sulphur homologue of phenol in, 572A
transforming growth factor as a marker for, 556A
tumor thickness in, 247A
tyrosinase and, 515
UVB exposure and, 581A
vascularization pattern in lymph node metastases of malignant, 243
vitiligo with alopecia alcreata and, 578A
thiouracil in metastatic, 873
Melanosomes
acidification of, 589A
regulatory activity in, 596A
Melasma
hormonal changes in, 551A
Menhaden oil
carcinogenesis and UVB with, 594A
Metabolism
correlation of transdermal drug transport and, 553A
Metalloproteinases
mononuclear phagocytes and, 616A
Methotrexate
liver function tests as predictors of biopsy proven hepatotoxicity in therapy for refractory psoriasis, 593A
Mg^{-2}
growth and proliferation of keratinocytes with calcium and, 612A
Microthread-like filamentous network
basement membrane zone and, 620A
Microvascular endothelial cells
shape and function of, 573A
Minoxidil
alopecia and, 575A
localization of radiolabeled, 574A
suppression of skin fibroblast lysyl hydrolase activity by, 591A
Monoclonal antibodies
carcinoembryonic antigen in skin tumors using, 613A
cornified envelopes and, 598A
deficient binding of, 595A
detection of leukocyte phosphodiesterase in atopic dermititis, 551A
differentiation antigens of melanocytes and melanoma, 459
EB virus transformation and, 567A
epidermotrophic migration of T cells and, 608A
heparan sulfate proteoglycan and, 590A
identification of P-450 isozymes with, 575A
keratohyalin granules and, 611A
melanoma and, 453
proteinase inhibitors and, 246A
trial to make anti-keratin, 574A
tyrosinase, 515
Monocyte derived neutrophil activating peptide, 251A
Monocyte preparations
chemoattractant peptides and, 558A
Mononuclear leukocyte procoagulant activity
psoriasis and, 251A
Mononuclear leukocytes
binding of peripheral blood, 17
Mononuclear phagocytes
neutral metalloproteinases secreted by, 616A

Morphogenesis
human fetal skin and, 566A
Mosquito bites
human humoral response to, 581A
Mosquito salivary antigens
AIDS and chronic pruritic dermatitis with increased antibody titers to, 597A
mRNA levels
psoriasis and, 555A
mRNA
basic fibroblast growth factor and production of, 579A
MSH receptors
generation of antibodies to, 596A
Mucosal immune response
dietary antigens and, 658
Mycobacterium leprae cell walls
immunological significance of, 589A
Mycosis fungoides
clonal rearrangement of T-cell receptor gene in plaque lesions of, 554A
increase in incidence of, 616A
T-cell clones in, 566A
Myeloperoxidase-hydrogen peroxide-chloride system
inhibition of growth of *Trichophyton Rubrum* by, 583A
Myocardiotoxicity
doxorubicin and, 618A
Myofibroblasts
wound contraction and, 616A

N

NAD (P) H:quinone
anthralin in, 248A
Na-Fluorescein
progressive systemic sclerosis and, 244A
Natural killer cell activity
basal cell carcinoma and, 591A
UVB and, 305
Neoplastic skin disorders
calcium/calmodulin-dependent protein kinase activity in, 582A
Nerve growth factor receptor
fetal skin and, 570A
Nerve growth factor
keratinocytes and, 619A
keratinocytes synthesize and express, 613A
Neurofibroma-derived fibroblasts-stimulating factor
neurofibromatosis and, 619A
Neurofibromas
characterization of perineurial cells cultured from, 571A
Neurofibromatosis
serum assay of neurofibroma-derived fibroblasts-stimulating factor in, 619A
Neuropeptides
regulation of inflammatory and immunologic responses with, 602A
Neutrophil chemotaxis
isotretinoin in cystic acne and, 885
Neutrophils
function in cystic acne, 580A
inhibition of neutrophil chemotaxis with 13-cis retinoic acid, 613A
interactions with basement membrane zone, 561A
regulation of intensity of contact hypersensitivity responses, 553A
Nevus cells
characterization and growth requirements of, 584A
properties of cultured human, 134
Newborn human foreskin
dermal macrophages from, 609A
Nicotinamide
polymorphous light eruption and, 242A
Non-genital Bowen's disease
human papillomavirus and, 575A
Nordihydroguaiaretic acid
anticarcinogenic activity of, 615A

O

1,25-dihydroxycholecalciferol
calcium and, 586A
102, 02, and OH
photoaging reactions involving protein cross-links and enzyme inactivation, 550A
Ofloxacin
bacterial activity in, 246A
OKM5 antigen
mycosis fungoides plaque stage and expression of, 716
Oleic acid concentration
promotion of drug transport across stratum corneum, 584A
Oligoneucleotides
splicing of, 557A
Oncogenes
tumors and, 252A
Oral carotenoids
photoprotection and, 55
Ornithine decarboxylase and calmodulin
phorbolester-induced mRNA responses for, 616A
Osteoblasts
retinoids and bone cell function, 615A
Oxidative stress
and defense systems in skin, 560A
lymphoblastoid cell lines and, 544A
Oxygen
superoxide dismutase and, 545A

P

P-450 isoenzymes
ciclopiroxolamin in, 238A
use of monoclonal antibodies to identify, 575A
Parathyroid hormone, 588A
Paroxysmal nocturnal hemoglobinuria erythrocytes
channel formation in, 617A
Pathway activation
complement activation by stratum corneum through the antibody-independent alternative pathway, 620A
Pemphigus antibodies
calcium for detection of antibodies of, 585A
Pemphigus foliaceus
autoantibodies in endemic, 585A
Pemphigus vulgaris antigen
expression of, 708
Pemphigus vulgaris
antigens in, 606A
expression of pemphigus vulgaris antigen in keratinocytes, 577A
Pemphigus
captopril in, 547A
plasminogen activator in, 777
Penetration enhancers
human skin and effects of, 810
Peptides
hydrolysis of, 575A
Percutaneous absorption
transepidermal water loss and, 604A
Peripheral blood neutrophils
functional defects of, 249A
Permeation studies
hairless mouse skin model form, 486
Persistent light reaction
cyclosporin A and, 239A
Phagocyte stimulation
arachidonic acid metabolism in, 251A
Phenotype
psoriasis and expression of abnormal, 578A
Phorbol ester
effects of retinoids, fluocinonide, and anthralin on, 563A
inflammatory dermatoses and, 684
orinithine decarboxylase and calmodulin, 616A
Phorbol myristate acetae
induction of G_o mobilization with, 44
Phosphatidylinositol 4,5 biophosphate
retinoic-acid induced hydrolysis and, 612A
Phosphatidylinositol kinase activity
psoriasis and increased, 599A
Phosphoinositol cycle
recruitment of G_o cells initiated by activation of, 44

Phospholipase A_2
human epidermis and, 23
Phospholipase activation
primary cutaneous irritancy and, 553A
Phospholipid metabolism
function of, 560A
Phosphoprotein phosphatase
enzyme and immuno-histochemical study of, 594A
Phosphorylated L-dopa
melanoma and, 596A
Photoacoustic injury
lasers and, 615A
Photoallergens
detection of, 563A
Photocarcinogenesis
polyprenoic acid and, 577A
Photochemotherapy
inhibition of primate immune response to cardiac allo- and xenografts by, 546A
Photofrin-I and Photofrin-II
lipid peroxidation and, 652
Photoinactivation of cloned T cells, 575A
Photoprotection
oral carotenoids and, 55
sunscreens and, 574A
Photosensitivity
8-MOP and, 818
Amiodarone and, 600A
effect of TCSA on induction and elicitation of, 561A
activation of xanthine oxidase pathway in, 544A
doxycycline and, 607A
khellin and, 720
Photosensitizers
detecting, 573A
Phototoxicity
histamine release in late phase of Hematoporphyrin derivative-induced, 568A
khellen in, 566A
Pigment
delayed tanning induced by UVA and UVB, 603A
epidermal thymocyte activating factor and, 611A
mammalian pigment system, 548A
mechanism of action of MSH in pigmentation, 589A
Piritrexim
treatment of psoriasis, 566A
PKC inhibition
sphingosine and, 559A
Plasminogen activators
cutaneous disease and, 777
keratinocyte urokinase-type, 823
psoriasis and, 86, 559A
sweat secretion and, 611A
reepithelialization and, 790
transforming growth factor beta and plasminogen activator inhibition, 617A
urokinase- and tissue-type, 790
Platelet activating factor
contact dermatitis and, 238A
Platelet-derived growth factor
scleroderma and, 562A
Polyendocrinopathies
vitiligo and, 783
Polymorphism
epidermal keratin genes and, 548A
Polymorphonuclear leukocytes
leukotriene B4 and, 254A
psoriasis and, 254A
Polymorphus light eruption
nicotinamide in, 242A
Polypeptide
psoriasis and synthesis of, 382
Ro antigenic epitopes and, 582A
Polyprenoic acid
photocarcinogenesis and, 577A
Porokeratosis
neoplastic clones in, 594A
Porphyria cutanea tarda
erythropoietic protoprophyria and, 599A
Porphyrins
photosensitization by psorlens and, 267
Portwine stains
treatment of, 395
Premature infants
transdermal theophylline bioavailability in, 617A
Primary cutaneous irritancy
in vitro model of, 553A
Pro α 1(I) collagen mRNA species
induction with ascorbic acid, 598A
Procoagulant activity
contact hypersensitivity and, 237A
Procollagen mRNA
ascorbate induction of, 420
Procollagen synthesis
ascorbic acid and regulation of, 611A
Profilaggrin gene
coding of, 568A
Progeria
elastin production and, 643
Proliferation and involucrin synthesis
epidermal homeostasis and, 739
Propionibacterium acnes
pathogenesis of acne, 247A
Prostacyclin release
interleukin-1 and, 604A
Prostaglandin D synthetase in rat skin, 448
Prostaglandin D_2
mastocytosis spleen cells and, 359
Prostaglandin-dependent mechanism
antigen-presenting cell recovery in UVR-exposed skin and, 311
Prostaglandins
hyperemia and histamine with, 618A
Proteins
BM 40, 247A
in nevus cells, 250A
vascular, 240A
Protein cross-links
enzyme inactivation and, 550A
Protein kinase activity
melanosomes and, 596A
Protein kinase C activity
psoriasis and, 406
regulation of terminal differentiation in keratinocytes with, 559A
Protein kinase
atopic dermatitis and, 526
keratinocytes and, 555A
Proteinase activities
invasive and metastatic potentials and, 869
25 kD protein marker of epidermal differentiation, 593A
bullous pemphigoid antigen is a basic 230 kD, 591A
cellular retinoic acid-binding, 608A
gamma interferon affects secretion of, 590A
immunofluorescence localization of peripheral, 331
solubilization of human hair for characterization of, 570A
Proteinase inhibitors
epidermal pathophysiology and, 246A
Proteoglycans
biological function of, 570A
Proteolipids
human epidermal, 185
terminal differentiation and, 565A
Proto-oncogenes
expression from normal and tumor tissues, 841
Protoporphyrin
mechanism of photoactivation of mast cells by ultraviolet light and, 545A
Pseudomonas skin infections
hydrogen peroxide and acetic acid in, 585A
Pseudoxanthoma elasticum
analysis of dermal connective tissue components in, 580A
Psoralens
specific receptor protein mediates biological actions of, 579A
UVB and, 543A
Psoriasis
angiogenic properties of psoriatic skin associate with the epidermis, 584A
biopsy proven hepatotoxicity in methotrexate therapy for refractory, 593A
cell envelopes bear antigens in, 600A

cyclosporin A and, 796
cyclosporin and, 251A, 605A
detection of gamma-interferon-induced protein in psoriatic plaques, 565A
distribution pattern of psoriatic kertoblasts, 382
8-MOP tumorigenesis in, 175
effect of Lonapalene, 550A
efficacy of topical treatments in, 615A
elevated growth hormone and, 550A
epidermal differentiation in normal and psoriatic skin, 801
epidermal plasminogen activator activity in, 86
expression of abnormal growth phenotype ion fibroblasts from patients with, 578A
fish-oil supplementation in retinoid-related hyperlipidemia, 544A
gamma interferon therapy of, 554A, 592A
group B and G streptococcus in gluteal fold, 593A
growth and differentiation of keratinocytes in, 239A
histamine-induced gap formation and, 589A
hypothalamus-pituitary-adrenal axis suppression and, 532
increased phosphatidylinositol kinase activity in, 599A
interferon production in, 511
interleukin-1 and, 552A
kallikreins in, 505
lesional psoriasis T-cell clones express UM4D4, 545A
membrane associated transglutaminase activity in, 556A
mononuclear leukocyte procoagulant activity in, 251A
mRNA levels in, 555A
new autoantibody specificity in, 606A
plasminogen activator and, 559A, 777
polymorphonuclear leukocytes and, 254A
protein kinase C activity in, 406
PUVA therapy and, 544A
restriction fragment length polymorphism and, 402
sn-1,2-diacylglycerol in, 612A
T-cell function in, 545A
transforming growth factor in, 558A
treatment with prirtrexim, 566A
UM4D4 in, 551A
Psoriatric Arthritis
cyclosporia A theory of, 586A
Psorlens
photosensitization by prophyrins and, 267
Pulsed dye laser
treatment for portwine stains, 395
Pulsed electrical stimulation
epidermal wound healing and, 553A
Pulsed irradiation
spotsize effects after, 877
PUVA therapy
cell metabolism and, 586A
psoriasis and, 544
vitiligo and, 565A
PUVA-48
skin cancer and, 560
Pyrimidine dimers
excision repair kinetics of UVB-induced, 814
UVB and, 346

Q

Quinidine
sweat secretion and, 604A

R

Radionuclide ventriculography
systemic sclerosis and, 244A
Receptor proteins
mediation of biological actions of psoralens by, 579A
Recessive dystrophic epidermermolysis bullosa
basement membrane in, 639
Recessive dystrophic epidermolysis bullosa
carboxyl-terminal domain of type VII collagen in, 604A
Reepithelialization
urokinase- and tissue-type plasminogen activators in wound, 790
Restriction fragment length polymorphism
psoriasis and, 402
Retinoic acid
differentiating keratinocytes and, biosynthesis of retinol from, 608A
epidermal growth factor and transforming growth factor with, 613A
hyaluronic acid synthesis and, 579A
modulation of epidermal growth factor receptors by, 620A
oxidation of retinol to, 552A
Retinoic acid-induced hydrolysis
phosphatidyinositol 4,5 biophophate and, 612A
Retinoids
arotinoid acid and keratin synthesis, 252A
BMY 30047, a topically active retinoid with low local and systemic toxicity, 592A
bone cell function and, 615A
characterization and effects of steroids and, 585A
effects on human fibroblasts, 249A
effects on phorbol ester-induced epidermal hyperplasia, 563A
epidermal keratinocytes and, 861
stimulation of endothelial cell proliferation, 610A
UVB-induced dermal damage and, 549A
Retinol
oxidation of, 552A
Ribosomal ribonucleoprotein
systemic lupus erythematosus and, 248A
Ringworm
fungus invasion into hair tissue in black dot, 729
Ro antigenic epitopes
polypeptides and, 582A
Ro positive Sjogren's syndrome
relationship between neonatal lupus erythmatosus and, 587A
Ro/SS-A antibodies
subacute cutaneous lupus erythematosus and, 158
Ro/SS-A antigens
scleroderma and, 237A

S

Salicyclic acid
effect on pH profile of human stratum corneum, 599A
stratum corneum reservoir effect of, 609A
Sarcoidosis
gamma-interferon in, 242A
Scanning acoustic microscopy, 238A
Scleroderma
antinucleolar antibodies in, 250A
disregulation of glycosaminoglycan and collagen production in, 558A
elevated soluble IL-2 receptors in, 551A
fibroblasts and increased collagen production in, 664
histamine in the pathogenesis of, 557A
identification of collagen fibrils in, 48
platelet-derived growth factor in, 562A
transforming growth factor beta and systemic, 572A
Sclerosis
radionuclide ventriculography in systemic, 244A
Se-Ax virus particle
Sézary syndrome and, 245A
Sebaceous glands
androgen receptor protein in hair follicles and, 606A
inhibition of androgen binding to receptor protein in hair follicle and, 605A
inhibition of proliferation of, 554A
morphological changes with aging in human females, 570A
translocation of androgen-receptor protein complex into nuclei of hair follicles and, 605A
Sebocytes
growth of, 603A
Seborrheic dermatitis
cell proliferation of, 578A
Seborrheic keratosis
proteinase activities in, 869
Secretory immunoglobulin A
identification of, 648
Sensitivity
antigens and contact, 608A
blood coagulation system and contact, 237A

epidermal Langerhans cells and contact, 246A
induction of tolerance to contact, 616A
Serine
keratinocyte urokinase-type plasminogen activator secreted as a single chain precursor, 823
Serum 3α androstanediol glucuronide
chest hair density in men and, 582A
Sézary syndrome
Se-Ax virus particle in, 245A
Shuttle vector plasmid
susceptibility to UVB damage, 573A
Sialylglycopeptides
angiokeratoma corporis diffusum and accumulation of, 573A
Simian virus 40-transformed keratinocytes
SSA/Ro antigen expression in, 342
Simplate-II bleeding-time device
epidermal repair in the elderly, 845
Sjogren's syndrome
antibodies to Ro/SSA antigens in, 237A
Skin and aging process, 773
Skin diseases
heritable, 774
Skin granulomas
T-cell function and, 430, 599A
Skin sandwich flap model
mechanisms of cyclosporine absorption in, 597A
sn-1,2-diacylglycerol
psoriasis and, 612A
Sodium polyanetholesulfonate-based medium
cutaneous microflora and, 574A
Somatomedin-C
glycosaminoglycan synthesis increased by, 603A
Sphingolipid biosynthesis
epidermal differentiation and, 590A
Sphingosine
PKC inhibition with, 559A
Spitz's nevi
diagnosis of, 253A
Spleen
homing pattern of photoinactivated antigen-reactive splenogytes, 551A
Spleen cells
cytokines and, 543A
Splenogytes
homing pattern of photoinactivated antigen-reactive, 551A
Spotsize effects
pulsed irradiation and, 877
Squamous cell
carcinoma of, 558A
fibroblasts and keratinocytes in, 548A, 615A
human papillomavirus in, 556A
proteinase activities in, 869
UV-induced, 598A
SSA/Ro antigen
simian virus 40-transformed keratinocytes and, 342
Steroidal androgen
antiandrogens, 250A
Steroids and retinoids
characterization and effect of, 585A
Steroids
psoriasis and superpotent topical, 532
Strain differences
in development of contact hypersensitivity, 576A
Stratum corneum acid hydrolase activity and permeability
effect of UVB on, 589A
Stratum corneum
drug diffusion studies in epidermal tissues and, 317
lipid liposomes in, 259
reservoir effect of salicyclic acid in, 609A
Strontium
keratinocytes cultured in, 690
Subacute cutaneous lupus erythematosus
anti-Ro antibodies and, 580A
Ro/SS-A antibodies in, 158
Substance P and substance K
keratinocyte proliferation and, 399
Sulphur homologue of phenol
melanoma and, 572A
Sun exposure
aging and, 248A
Sunscreens
photoprotection with, 574A
UVB and, 305
Superoxide dismutase
characterization of, 31
oxygen and, 545A
UVB effect on activities of, 576A
Superoxide radicals
cutaneous reactive hyperemia, 586A
Suppressor cell activation
tumor promotors and, 293
Suppressor-inducer lymphocytes
immunophenotypic analysis of, 604A
Surface microscopy
malignant melanoma and, 252A
Surfactants
human cutaneous response to mixed, 601A
SV40/Ad12
transformation of human melanocytes with, 571A
Sweat glands
identification of secretory immunoglobulin A in, 648
Sweat secretion
epidermal growth factor in cystic fibrosis, 584A
glandular kallikrein and angiotensin converting enzyme in eccrine, 569A
hypohidrotic ectodermal dysplasia-hair protein patterns and sweat gland function, 579A
immunoreactive IL-1 and, 554A
mechanism of, 573A
plasminogen activator in, 611A
quinidine and, 604A
Systemic lupus erythematosus
effects of lupus anticoagulant on, 744
elevated soluble II-2 receptors in, 551A
Langerhans cells and, 573A
ribosomal ribonucleoprotein in, 248A
Systemic scleroderma
T regulatory lymphocytes in, 851
13-cis retinoic acid
inhibition of neutrophil chemotaxis with, 613A

T

2,3,7,8-tetrachlorodibenzo-p-dioxin
effects of, 354
increased Langerhans cells with, 600A
studies of cutaneous response to, 605A
T cell-derived antigen binding factor
delayed-type hypersensitivity and, 244A
T cells
activation by anti-CD3 antibodies, 602A
allergic contact hypersensitivity and functional deficiencies of, 546A
analysis of T cell human dermal microvascular endothelial cell interactions, 561A
antigen expression patterns in, 568A
antigen specific T cells in delayed hypersensitivity, 572A
atopic dermatitis and cyclosporine A, 612A
basal cell carcinoma infiltration and, 289
CD3+ cells and T cell differentiation antigens, 560A
clonal proliferation of T lymphocytes in T cell neoplasm, 612A
clonal rearrangement of T-cell receptor gene in plaque lesions of mycosis fungoides, 554A
DNA-cytophotometry of T-cell lymphoma, 425
epidermal cells and development of, 244A
epidermal interleukin-1 in cutaneous lymphoma of, 378
epidermis in development of, 240A
epidermotrophic migration of, 608A
fetal thymocytes and Thy-1+ dendritic cells, 581A
function in psoriasis, 545A
immunoglobulin gene rearrangement in clonal T-cell malignancy, 73
induction of antigen-specific T cell unresponsiveness by Ia^+ keratinocytes, 562A
induction of maturation of, 560A
infiltration of, 608A
interleukin-6 and activation of, 578A

killer cell activity in T-cell lymphoma, 571A
Langerhans cells and activation of, 320
Langerhans cells and T helper cell lines, 568A
Langerhans cells and Thy-1+ dendritic epidermal cells in priming and suppressing allospecific cytoxic, 610A
markers in T cell lymphoma, 549A
skin granuloma and function of, 430
skin granulomas and function of, 599A
specific vaccination against photoinactivated cloned, 575A
systemic scleroderma and defects of, 851
T-cell clones in mycosis fungoides, 566A
T-cell receptors on dendritic cells of human epidermis, 565A
T helper/suppressor ratios in bone marrow of patients with cutaneo T cell lymphomas, 587A
Thy-1+ dendritic cells and T-cell receptors, 240A
UVB irradiation and activation of, 246A, 556A
UVB-exposed skin and, 544A
TCSA
induction and elicitation of contact photosensitivity, 561A
Tepoxalin
a new cyclooxygenase/lipoxygenase inhibitor, 550A
dermatologic inflammatory disorders and, 589A
Testosterone
androgen dependent dermal pigment, sebaceous glands, and hair follicles with, 619A
Theophylline
premature infants and transdermal, 617A
systemic scleroderma and, 851
Thioredoxin reductase
Hermansky-Pudlak syndrome and, 372
melanoma and, 606A
Thiouracil
metastatic melanomas and, 873
Thy-1+ dendritic cells
beta lipotropin activity and, 548A
cloning of concanaval in A-reactive cells and, 671
hypersensitivity and, 567A
induction of tolerance to contact sensitivity by, 616A
profile of, 593A
strain differences in proliferative responses to concanavalin A, 611A
T-cell receptors and, 240A
Thy-1 expression in neonatal epidermal cultures depleted of, 585A
Thymic cells
morphologic similarities between keratinocytes and, 749
Thymic epithelial cells
colony stimulating factors produced by, 580A
Thymidine incorporation
keratinocytes and, 2
Thymidine
human keratinocytes catabolize, 8
transforming growth factor beta and, 547A
Transforming growth factor
marker for melanoma, 556A
Tranglutaminase
decreased cell envelopes and, 564A
Transdermal drug transport
metabolism and, 553A
Transepidermal water loss
percutaneous absorption and, 604A
Transforming growth factor beta
endothelial cells and, 547A
keratinocyte-derived lymphocyte inhibitory factor, 592A
keratinocytes and, 336
plasminogen activator inhibitor and, 617A
systemic sclerosis and, 572A
Transforming growth factor
growth regulation in human keratinocytes and, 599A
psoriasis in, 558A
Transglutaminases
in normal and transformed human keratinocytes, 475
localization and in vivo activity of epidermal, 472
psoriasis and, 556A
Transport inhibitors
sweat secretion and, 573A
Trichophyton rubrum
inhibition of growth of, 583A
Trichophyton mentagrophytes,
macroconidia in, 165
T6 positive cells
burns and, 142
Tumor necrosis factor
fibroblast function and, 250A
granulocyte activation and, 255A
inflammation in skin and, 571A
peripheral blood neutrophils oxidative metabolism and, 245A
Tumor promotors
Langerhans cell function and, 293
Tumoricidal activity
mast cell granules and, 574A
Tumors
basal cell carcinoma immunoinfiltration, 289
cationic photosensitizers in melanoma cells, 594A
8-MOP phototumorigenesis, 175
factor XIIIa is expressed by dermal stellate cells in fibrovascular, 592A
fibro-histiocytic, 239A
5-S-cysteinyldopa and melanoma, 149
management with photoradiation therapy with prophyrins and light, 652
oncogenes in, 252A
porokeratosis and development of, 594A
properties of cultured nevus cells and, 134
proto-oncogenes in, 841
tumor thickness in thin melanoma, 247A
vascular proteins and growth of, 240A
Type IV collagen
enhancement of collagenase synthesis by human keratinocytes, 597A
Type VI collagen
fetal skin and, 609A
Type VII collagen
anchoring fibrils and, 480
in epidermal basement membrane, 639
Tyrosinase
melanocytes cultured with vitamin D and immunoreactive, 882
monoclonal antibody against, 515

U

Ulcers
mast cells in, 548A
Ultrastructural immunolocalization, 320
Ultraviolet radiation
antigen-presenting cells in epidermis after, 576A
antigen-presenting cell recovery in skin exposed to, 311
cis-urocanic acid and defective antigen presentation with, 92
collagen changes induced by, 145, 607A
collagen metabolism and, 576A
contact hypersensitivity and, 552A, 547A
daily exposure of adolescents to, 581A
delayed tanning induced by UVA and, 603A
dermatoheliosis and exposure to, 325
dysplastic nevus syndrome and, 619A
effect of UVB on stratum corneum acid hydrolase activity and permeability, 589A
elastic fiber damage and exposure to, 697
enhanced susceptibility to bacterial and fungal infections in animals exposed to, 552A
epidermal cell proliferation and, 549A
excision repair of UVB-induced pyrimidine dimers in DNA of human skin, 814
glucocorticoid triamcinolone acetonide and UVB-induced immune suppression, 366
histamine release inhibition with UV light, 239A
in vivo release of IL-1 like activity in skin after, 591A
increased T suppressor cell activity and, 544A
induction of Ro and La antigens on human keratinocytes, 561A
influence of dietary menhaden oil upon carcinogenesis and response to, 594A
interleukin-1 and, 252A
Langerhans cells and T-cell activation, 612A
lasers, 761
mast cell function and, 806
natural killer cell activity and, 305
neutral glycolipids and, 609A
oral carotenoids and exposure to, 55
photoinduction of prolonged cutaneous photosensitivity by topical 8-MOP, 818

protein kinase C activation and, 585A
psoralens and, 543A
pyrimidine dimers and, 346
rapid diagnosis of sensitivity to, 467
recovery from bone marrow suppression and, 547A
regulation of tumor-specific and MHC antigens in UVB-induced skin cancer, 263
release of IL-3 like activity by PAM 212 by, 610A
retinoids and repair of dermal damage in, 549A
shuttle vector plasmid damage, 573A
squamous cell carcinoma induced by, 598A
stimulation of arachidonic acid release and prostaglandin production by, 567A
stimulation of melanocytes by vitamin D, 882
superoxide dismutase activities of the skin and, 31, 576A
T-cell activation and, 246A, 556A
UV light induced 8-methoxypsoralen-DNA adducts, 617A
UM4D4
lesional psoriasis T-cell clones express, 545A
psoriasis and, 551A
Uroporphyrinogen-1-synthase
lymphocytes and, 247A
Urine
detection of human papillomavirus in, 241A
Urticarial syndromes
anti-IgE autoantibodies in, 213

V

Varicosis in children and juveniles, 251A
Vascular birthmarks, 773
Vascularization pattern
lymph node metastases in malignant melanoma and, 243A
Vasoactive amine system
UVB and, 806
Vimentin in nevus cells, 250A
Vitamin A acetate
contact hypersensitivity and, 595A
Vitamin D
stimulation of melanocytes by, 882
Vitiligo
autologous cultured cells as a treatment for, 549A
histopathological spectrum of, 565A
HLA-D regions antigens in Black patients with vitiligo, 555A
immunologic mechanisms in, 783
melanomas and alopecia acreata in, 578A
PUVA therapy and, 565A
von Willebrand factor
AIDS and, 703

W

Wash-off products
isothiazolinone and, 554A
Water concentration profile across human skin, 218
Water deprivation and replenishment
avian dermal differentiation, adaptive response to, 588A
Water loss
allergic reaction and cutaneous blood flow and transepidermal, 240
Wheat flour allergenic components
IgE antibodies and, 249A
White piedra
bacteria in pathogenesis of, 586A
Wounds
acceleration of epidermal wound healing by basic fibroblast growth factor, 568A
BM 40 in healing of, 247A
bovine-derived activated platelet releasate and treatment of chronic, 608A
enhancement of wound closure and breaking strength with acidic fibroblast growth factor, 587A
fluid from chronic wounds stimulates glycosaminoglycan synthesis by dermal fibroblast cultures, 557A
influence of serum on bacterial adherence, 595A
localization of collagen mRNA in wounded skin, 606A
lymphocyte adhesion to specialized endothelium in, 567A
maturation markers and healing of, 770
pulsed electrical stimulation on epidermal wound healing, 553A
pulsed recombinant human epidermal growth factor in partial thickness wound healing, 588A
relationship of fibroblast phenotype and matrix assembly to wound contraction, 616A

X

Xanthine oxidase pathway
photosensitization and, 544A
Xanthoma
immunoperoxidase staining of collagenase and inhibitor in eruptive, 551A
Xeroderma pigmentosum
assignment in group E in, 152
carrier detection in, 605A
diagnosis of, 467
influence of nucleosome structure on activity of DNA nuclease activities in, 595A
X-linked ichthyosis
cholesterol sulfate in, 238A
